

It's time to consider getting the Flu Vaccine!!

Where to Get Cheap Flu Vaccines

If you don't have health insurance, there are several retailers offering fairly cheap flu shots for the 2018-2019 flu season. (If you do have health insurance, please check with your carrier as to how they prefer to administer the flu shot).

Most are not offering their flu shot prices online, but here is the pricing that I found:

Costco Flu Shots: costs \$19.99 for quadrivalent. Costco is the cheapest on this list if you don't have insurance. Flu shots at the Costco Pharmacy is one of the [services you can get from Costco without a membership](#).

- **CVS Flu shots**: costs \$22-\$66.99 for quadrivalent (varies by location, so call ahead). Get a \$5 off \$25 coupon.
- **Walgreen's Flu Shots**: costs \$39.99 for quadrivalent.
- **Rite Aid Flu Shots**: costs \$40 for quadrivalent.
- **Meijer Flu Shots**: costs \$35.99 for quadrivalent.
- **Wal Mart Flu Shots**: costs \$34.99 for quadrivalent.
- **Sam's Club Flu Shots**: costs \$30 for quadrivalent. Flu shots at the Sam's Club Pharmacy is one of the [services you can get from Sam's Club without a membership](#).
- **Kroger Flu Shots**: costs \$40 for quadrivalent.
- **Target Flu Shots**: costs \$39.99 for quadrivalent. Note that CVS now runs all Target pharmacies, so prices are the same, but you do get a \$5 Target gift card if you get a flu shot at a Target CVS pharmacy.

Quadrivalent vaccine cannot cause influenza illness because the vaccine viruses used to make it are "inactivated" (killed or weakened).
